FELLOWES SHREDDER RANGE

Fellowes®

THE FUTURE OF BUSINESS MACHINES IS HERE TODAY – WITH FELLOWES INSIGHT

At Fellowes we believe that a deep understanding of consumer behaviour lies at the heart of creating products that people enjoy using. To ensure that all our products meet the high standards of our customers Worldwide, we invest in primary research, talking to users in many environments around the globe, to find out what really matters to them. The results are sometimes surprising – and as you will see from our complete range of Business Machines, customer's values have informed every aspect of their design.

CONTENTS

THE WORLD'S TOUGHEST SHREDDERS™

WHY SHRED?

Information theft occurs when an individual's or company's personal or confidential information is obtained and used by another person without their knowledge. Identity fraud happens when criminals use this information fraudulently to obtain credit, goods or other services in that person's or company's name.

HOW DOES IDENTITY FRAUD HAPPEN?

Every day you deal with thousands of pieces of information: reports, business plans, financial data, customer pricing, names and addresses, credit card details. Identity thieves will "raid" your rubbish bin to steal this information – they may even steal your bin bags to rummage through them at their own leisure. It's faster, easier and can be even more lucrative than burglary. To a fraudster the information you throw out is worth its weight in gold.

Information theft is one of the fastest growing crimes and continues to rise at an astounding rate. It's not only individuals that are putting themselves at risk – but also businesses and organisations putting their customers and employees at risk by not disposing of personal information securely.

All countries have data protection legislation in place to ensure that companies dispose of documents safely and securely. But businesses should also consider the prospect of damaging their business and losing customer confidence by not disposing of information securely and therefore putting people at risk.

Benefits of On-Site Shredding

- Ensures documents are disposed of safely and securely
- Protects your employee, customer and supplier information ensuring they have confidence in your company
- Increased security as documents do not have to be stored prior to disposal
- Convenient because you can shred when you need to rather than having to store them until they are collected
- Increase internal compliance with document disposal policy because employees are more likely to shred if they can do it when they need to
- Cheaper than off-site shredding as it only requires a one off investment rather than continual payments

WHAT TO SHRED?

Every piece of paper or document that contains some form of information or data that may be of use to criminals, fraudsters or competitors should be shredded before it is thrown in the bin or recycled. Confidential documents are obvious and the people who have access to them will be aware of their importance and how to dispose of them. It's the pieces of information that don't seem important which are likely to slip through the net.

Personal Documents
- Bank/Credit card statements
- Credit/Debit card receipts
- Utility bills
- Voided/cancelled cheques
- Documents showing signatures
- Tax returns

Company Documents
- Client lists
- Salary details
- Sales figures
- Financial reports
- Personnel files/CVs
- Patent information
- Medical records
- Legal documents
- Letter-headed paper

77% of rubbish contains information which can be used to steal an identity

Fellowes

WHICH SHREDDER?

When choosing a shredder it is essential to ask the following questions:

1. WHERE WILL THE SHREDDER BE USED?

Use the segmentation icons to identify the shredder range ideal for where it will be located and how many users it will have.

PERSONAL

COMMERCIAL

2. WHAT LEVEL OF SECURITY IS REQUIRED?

Shredders are segmented into security categories called DIN levels. The higher the DIN level the better the protection.
The panel below depicts the different DIN levels available on Fellowes Shredders.

STRIP CUT
DIN 1

BASIC
7mm strips
Cuts 1 piece of
A4 paper into
30 pieces

STRIP CUT
DIN 2

EVERYDAY
5.8mm strips
Cuts 1 piece of
A4 paper into
51 pieces

CROSS CUT
DIN 3

HIGHER
3.9x38mm particles
Cuts 1 piece of
A4 paper into
320 pieces

MICROSHRED
DIN 4

SUPERIOR
2x8mm particles
Cuts 1 piece of
A4 paper into
3898 pieces

See overleaf for the unique features
available on Fellowes shredders >

WHAT FEATURES?

When choosing a shredder you must also identify what features you would like:

SAFESENSE® AUTOMATICALLY STOPS THE SHREDDER WHEN TOUCHED

SAFETY LOCK
disables shredder to prevent accidental activation.

SAFE SENSE™ TECHNOLOGY

SAFESENSE®
An electronic sensor surrounds the shredder's "throat," and shuts down the machine immediately when it comes in contact with the energy field created by warm-blooded animals. The patent pending SafeSense® technology ensures the safety of the user, by automatically disabling the shredder when touched.

TURBO JAM RELEASE

TURBO JAM RELEASE
powers through paper jams quickly and easily.

AUTO OIL
automatically lubricates the cutting mechanism whilst the shredder is in use. The patent-pending Auto-Oil Mechanism provides a clean and simple way of maintaining the shredder's performance.

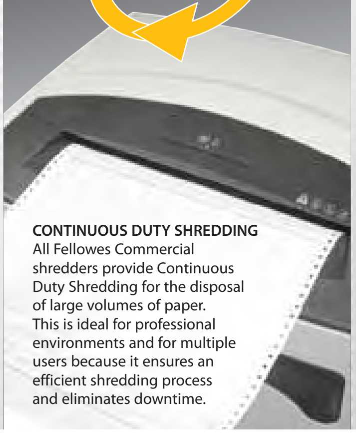

AUTO OIL

SHEET CAPACITY GAUGE
helps prevent paper jams by enabling the user to identity how many sheets to shred at one time.

CONTINUOUS DUTY SHREDDING

CONTINUOUS DUTY SHREDDING
All Fellowes Commercial shredders provide Continuous Duty Shredding for the disposal of large volumes of paper. This is ideal for professional environments and for multiple users because it ensures an efficient shredding process and eliminates downtime.

SEPARATE THROAT & WASTE BIN
Enables CDs/DVDs to be kept separate from the shredded paper, making recycling easier.

100% JAM PROOF

100% JAM PROOF
The patent-pending 100% Jam Proof System detects the thickness of the paper entering the shredder and intelligently establishes whether too much paper has been inserted. The visual display located near the control panel will show consumers whether they are under-feeding or over-feeding the shredder so they can maximise the performance and efficiency of the shredder.

100% JAM PROOF AUTO-STOPS THE MACHINE WHEN TOO MUCH PAPER IS INSERTED

Fellowes

OF ALL THE WAYS
TO FIX SHREDDER JAMS
ONLY ONE MAKES SENSE
Fellowes
INTRODUCING OUR NEW LINE OF 100% JAM PROOF SHREDDERS
The pulling. The prying. Clearing a paper jam can be a tough task. Not anymore. The new Intellishred™ Series from Fellowes is 100% Jam Proof and backed by a Worry-Free warranty. Our proprietary technology measures paper thickness, and an indicator light alerts you to a potential jam before it can happen. Innovations like this are why Fellowes shredders are used by more businesses worldwide than any other. Experience for yourself the end of the paper jam. Put down your sledgehammer and visit www.fellowes.com.au to see the Intellishred Series in action.

THE RIGHT SHREDDER FOR YOUR NEEDS

Commercial Shredders

DID YOU KNOW...

The C-480C and C-420C are the new Worry-Free office shredders. Equipped with the 100% Jam Proof System, SafeSense® and the new Auto Oil feature, they look after themselves as well as the user - ideal for professional use in a busy working environment.

LARGE OFFICE
20+ USERS

Powershred C-480C / C-480

- High performance engineering enables continuous use for multiple users
- Heavy-duty motor for professional demand
- Solid steel cutters for durability
- 100% Jam Proof System auto-stops & reverses the machine when too much paper is inserted (only on cross-cut model)
- SafeSense® technology stops shredder when touched (only available on cross cut model)
- Auto-Oil Mechanism automatically oils the shredder to maintain the highest performance (only available on cross-cut model)
- Wider throat width permits shredding of A3 and continuous computer paper, speeding up the shredding process
- Large bin capacity reduces downtime
- User friendly control panel maximises ease of use
- Electronic auto-start maximises ease of use
- Inside door facility for storing manual and shredder bags
- Castors allow for increased mobility

- Microshreds fill the basket nearly half as fast as standard Cross-Cut, so you empty less often

SHREDDER SPECIFICATIONS

TERMINOLOGY

COOL DOWN PERIOD
The length of time the motor takes to completely cool down after the thermal overload protection feature has been triggered.

CUTTER WARRANTY
The length of time the cutting blades of the machine are under warranty.

DIN LEVEL
Shows the security level of the shredder grouped by classifications; basic (DIN 1), higher (DIN 2 & DIN 3), superior (DIN 4).

ELECTRONIC AUTO-START
This auto-start functions when a sheet is passed through a beam of light, reducing the risk of jamming.

MACHINE WARRANTY
The length of time the machine and all its parts are under warranty

MECHANICAL AUTO-START
This auto-start functions when a sheet of paper triggers a micro-switch, which starts the shredding process.

NOISE LEVEL AT CAPACITY
The amount of noise produced by the shredder (in decibels) whilst in use at full sheet capacity.

RUN TIME
The length of time the shredder will run before the thermal overload protection feature is triggered allowing the motor to cooldown before it can be operated again.

SHEET CAPACITY
Number of sheets that can be fed into a shredder in one go. This value is calculated using 80gsm A4 paper.

SHRED SPEED
The average speed paper is fed through the shredder, measured in metres per minute.

THERMAL OVERLOAD PROTECTION
Protects the shredder motor from overheating and lengthens the product life.

THROAT WIDTH
The throat or entry width of the opening into which the paper is fed. This determines the size of the paper that can be used without folding it.

Fellowes

INTRODUCING
POWERSHRED®
100% JAM PROOF SHREDDERS

100% JAM PROOF

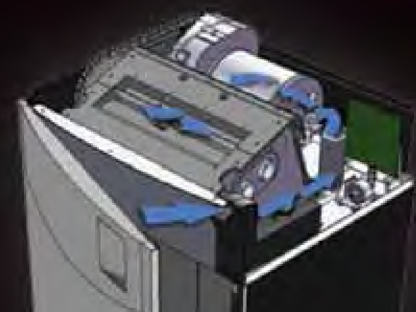

100% JAM PROOF SHREDDERS

NEW technology stops frustrating jams before they start! When the shredder is overfed, the light turns red and the shredder pauses so you can remove excess paper. The lights also indicate how close you are to capacity, so you can shred more and get the job done faster.

AUTO-OIL™ FEATURE

Hassle-free, no-mess shredder maintenance for the busy office. The Auto-Oil™ Feature lubricates the shredder automatically to enhance performance and extend shredder life.

Protect More than Your Information

At Fellowes, we take shredder safety very seriously. We believe that you can never be too careful when it comes to your family or your employees.

That's why Fellowes developed SafeSense® Technology, a built-in sensor that immediately halts shredder operation on contact. Whether it's an employee's tie, a child's hand, or a dog's paw, Fellowes shredders immediately stop shredding when the paper opening is touched.

Patented SafeSense® Technology is only available from Fellowes on select models.
